● Web development internship

Prodigy infotech

2024

- Took an online course to learn more about web design and management, and successfully finished the course with the highest score
- Designed a website for a local TV by applying the skill received from the course and years of experience as a graphic designer, which resulted in the improvement of the website performance and web traffic by 46%
- Won the second place in the website design competition held by Studio Shodwe and received award money

Projects

Tic-Tac-Toe Game – Built a browser-based 2-player game using HTML, CSS, and JavaScript. Implemented win/draw logic, interactive UI, and reset functionality with clean, responsive design.

Weather App – Created a responsive weather application using HTML, CSS, and JavaScript. Fetched real-time weather data from a public API and displayed location-based temperature, humidity, and conditions.

Inventory Management System – Developed a full-stack system to manage clothing stock, billing, and product tracking.

Used React, Node.js, Express, and MongoDB to handle inventory updates, invoice generation, and user roles
